Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Expression not restricted to IL-6 responsive cells.

- IDISBASE: Isoform 2 is an autoantigen found in rheumatoid arth (RA) but it is not specific to patients with RA.
- I- SIMILARITY: Contains 1 immunoglobulin-like C2-type domain.
- ISIMILARITY: Contains 5 fibronectin type III domains.
- I- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
- I- DATABASE: NAME-PROW; NOTE-CD guide CD130 entry;

SUBUNIT: Heterodimer of an alpha and a beta chain.
SUBCELLULAR LOCATION: Type I membrane protein (1sc
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           FUNCTION: Signal-transducing molecule. The receptor systems for IL-6, LIF, OSM, CNTF, IL-11 AND CT-1 can utilize gp130 for initiating signal transmission. Binds to IL-6/IL-6-R (alpha chain) complex, resulting in the formation of high-affinity IL-6 binding sites, and transduces the signal Does not bind IL-6. May have a sites, and transduces the signal of the signal bind IL-6.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Secreted (isoform 2).

```
-!- FUNCTION: SIGNAL-TRANSDUCING MOLECULE. THE RECEPTOR SYSTEMS FOR IL-6, LIF, OSM, CNTF, AND IL-11 CAN UTILIZE GP130 FOR INITIATING CONTRACTION. BINDS TO IL-6/IL-6-R (ALPHA CHAIN) COMPLEX, RESULTING IN THE FORMATION OF HIGH-AFFINITY IL-6 BIDDING SITES, CC AND TRANSDUCES THE SIGNAL. DOES NOT BIND IL-6. MAY HAVE A ROLE IN EMBRYONIC DEVELOPMENT (BY SIMILARITY).

CC -!- SUBUNIT: Heterodimer of an alpha and a beta chain.

CC -!- SUBUNITAR LOCATION: Type I membrane protein.

CC -!- TISSUE SPECIFICITY: FOUND IN HEPATOCYTES, ASTROCYTES, FIBROBLASTS AND EXDOTHELIAL CELLS.

CC -!- SIMILARITY: Contains 1 immunoglobulin-like C2-type domain.

CC -!- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        01-FBB-1995 (Rel. 31, Created)
